

## STUDY ON DYSLEXIA IN THE WORKPLACE

Researchers at the University of Kansas Business School and Penn State's Smeal College of Business are conducting a landmark study on the experience of dyslexics in the workplace. The study is one of the first of its kind to focus exclusively on dyslectics at work

We hope to talk with those who are more open and those who are more closed about their dyslexia at work, and learn about the skills you have developed to navigate the workplace. We are therefore looking for adult participants who have been diagnosed with dyslexia and are actively engaged in the US labor force. We hope to conduct one-hour phone interviews, organized at a time of your convenience.

To let us know whether you would be willing to participate please click on the following link. It will take you to a secured website where you can leave your contact information, and where we also ask just a few background questions that are relevant to our study.  
[https://kansasedu.qualtrics.com/SE/?SID=SV\\_1NwEgcAY4A8S9Nj](https://kansasedu.qualtrics.com/SE/?SID=SV_1NwEgcAY4A8S9Nj)

Niki den Nieuwenboer, a member of the research team, is a member of Dyslectic Advantage and has dyslexia herself. The team will share the study's results with Dyslectic Advantage, and we are therefore hopeful that you will help with this important research.

We look forward to talking with you!

Niki den Nieuwenboer, Ph.D.  
Kristie Rogers, Ph.D.  
Linda Treviño, Ph.D.  
Tiffany Johnson (Ph.D. candidate)
